

Curti Lifts

Designs to move you

Lifts, by people who care.

Nationwide lift installations, service & maintenance, repairs and 24/7 emergency support.

Who We Are

Keep lifts moving. Without the hassle.

Curti Lifts helps businesses across the UK install, replace, service and support lifts that work.

From new lift installations and turnkey replacements to service & maintenance, lift repairs and 24/7 emergency callout, everything is handled by one team.

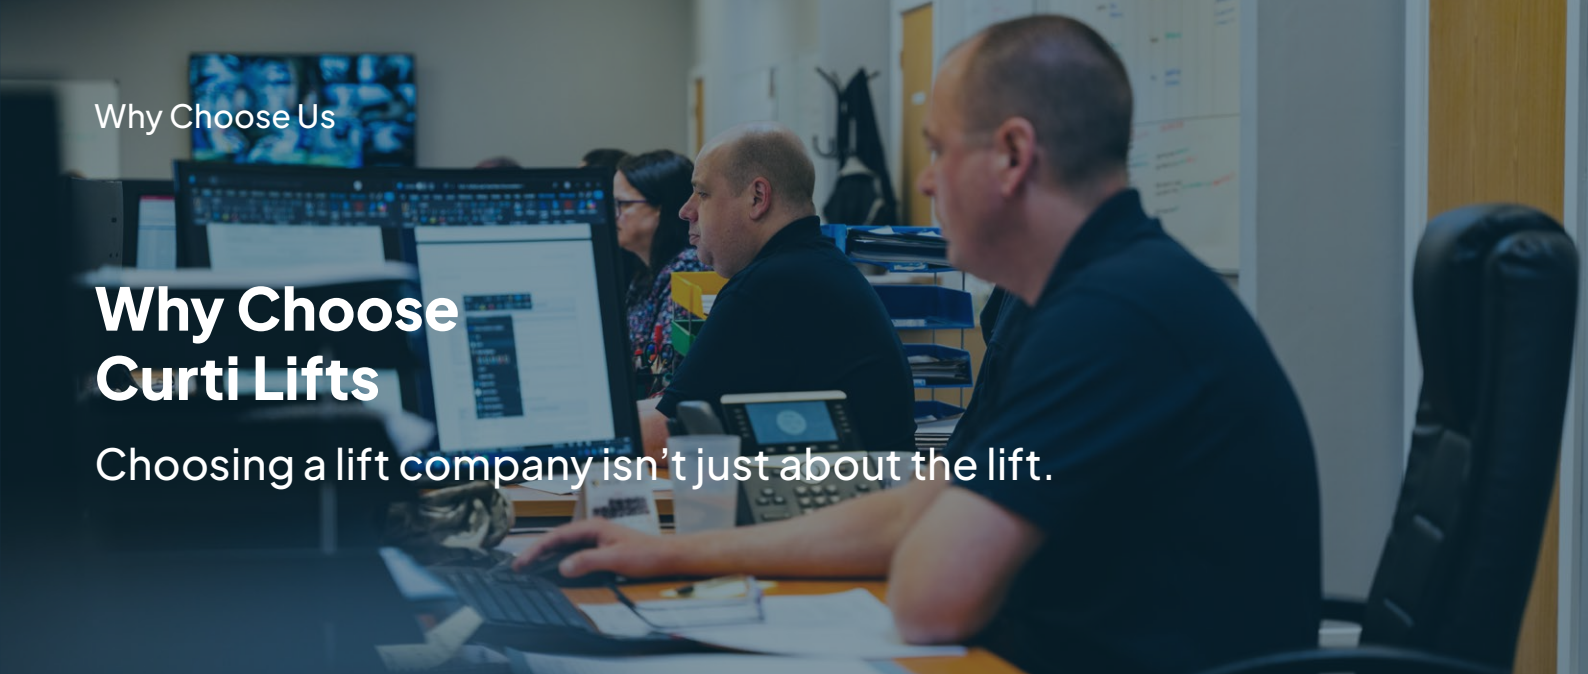

Curti Lifts is national in reach, but personal in how it works. Clients deal with real people who understand the job, understand site pressures and stay accountable throughout.

Clear communication. Clear responsibility.

Just a professional team that keeps buildings moving and makes lift projects easier to manage.

**This is where Curti
Lifts stands apart.**

Why Choose Us

Why Choose Curti Lifts

Choosing a lift company isn't just about the lift.

It is about how easy the job is to manage, how clearly things are communicated, and how quickly problems are handled when they come up.

One point of contact

You deal with one team from start to finish.

Clear, proactive communication

You are kept informed at every stage.

We take ownership

We deal with problems properly and see the job through.

Open protocol installations

No unnecessary supplier lock-in.

Real people on the phone

You speak to someone who understands the job and can act straight away.

Clear. Responsive. Accountable.

This is what makes Curti Lifts easier to work with.

One partner for the full lift lifecycle.

We support clients across the UK with lift installation, replacement, servicing, repairs and emergency response.

Our core services

New Lift Installations

Passenger, goods and bespoke lift installations designed around the building, the users and the long-term needs of the site.

Turnkey Lift Replacement

A fully managed replacement service, from survey and removal through to installation, testing and handover.

Service & Maintenance

Planned maintenance that helps reduce downtime, protect performance and keep lifts compliant.

Lift Repairs

Fast diagnosis, reliable repairs and honest advice on what needs fixing and what does not.

24/7 Emergency Callout

Round-the-clock support across the UK, with real people on the phone and engineers ready to respond.

Keep lifts moving.

Keep clients informed.

Take responsibility from start to finish.

Repair, Modernise or Replace?

We'll help you make the right call.

Not every lift needs replacing.

Sometimes a well-planned repair or targeted modernisation is the smarter option. Other times, repeated breakdowns, obsolete parts and growing disruption make replacement the better long-term answer.

Curti Lifts helps you understand the difference.

We assess the lift, the building, the usage and the long-term cost of keeping things as they are. Then we give clear advice on the best route forward.

Replacement may be the right option when:

Breakdowns are becoming more frequent

Parts are difficult or expensive to source

The lift no longer suits the building

Accessibility requirements have changed

Repair costs are no longer sensible

Long-term reliability is becoming a risk

If replacement is the right route, Curti Lifts can manage the full process under one roof.

Survey. Planning. Removal. Installation. Testing. Handover.

One team taking responsibility throughout.

One company. One contact. One clear plan.

Replacing a lift is rarely just about the lift.

The Curti Lifts Turnkey process

It can involve surveys, removal, site protection, building works, electrical preparation, installation, testing and handover.

When too many parties are involved, responsibility gets blurred.

Curti Lifts manages the full replacement process under one roof, with one dedicated project manager keeping the job moving from start to finish.

1. Research

Survey the site and confirm what the lift needs to do.

2. Review

Clear proposal, programme and scope before work starts.

3. Remove

Safe removal of the existing lift and protection of the site.

4. Work

Associated builders' works and preparation completed.

5. Install

New lift installed by Curti Lifts engineers.

6. Restore

Testing, commissioning and handover completed.

One plan. One team. One clear line of responsibility.

New Lift Installations

Designed around the building. Built for long-term use.

Curti Lifts installs new passenger, goods, access and bespoke lift systems across the UK.

Every project is shaped around the building, the people using it and the long-term demands of the site.

Lift solutions include

- Passenger lifts
- Goods lifts
- Bed and stretcher lifts
- Platform and access lifts
- Scenic and bespoke lifts
- External and steel-supported lift solutions

Built around your site

Tailored design

Cabin sizes, finishes and features chosen around the building and users.

Open protocol

No unnecessary supplier lock-in for future servicing and maintenance.

Ongoing support

Warranty-backed installations with service options from the Curti Lifts team.

The result

A lift that fits properly, performs reliably and stays easier to manage over time.

**No confusion.
No overcomplication.
Just a clear route forward.**

Service & Maintenance

Service & Maintenance

A lift only really gets noticed when it stops working.

It is about keeping buildings moving, reducing disruption and dealing with issues before they become bigger problems.

With Curti Lifts, clients get:

- Regular planned maintenance
- Comprehensive safety checks
- Clear reporting and communication
- Qualified engineers who knows the site
- 24/7 support when issues need escalating

The aim is simple.

Keep the lift running properly.
Keep downtime to a minimum.
Keep the client informed.

24/7 Emergency Callout

24/7 Emergency Callout

We're ready to start
when you stop.

Lift breakdowns do not wait for office hours.

That is why Curti Lifts provides true 24/7/365 emergency callout support, with real people on the phone and real engineers ready to respond.

Our response promise

- 1-hour on-site target for entrapments
- 4-hour target for urgent breakdowns
- Nationwide engineer coverage
- Large selection of parts stocked in-house for quicker fixes

What happens when you call

- You speak to a real person
- We dispatch the nearest available engineer
- We keep you updated on arrival and progress
- We get the lift back to a safe standard

Day or night. 365 days a year.

Real people on the line, real engineers on their way.

Lift Repairs

When your lift breaks,
we fix it properly.

A faulty lift is more than an inconvenience. It disrupts your building, frustrates users and can quickly become a safety issue.

Curti Lifts responds quickly, diagnoses the real problem and gets lifts back into safe working order without delay.

We do not believe in quick fixes that fail a week later.

**If a repair is the right solution,
we act fast and get it done.**

If the lift is becoming unreliable or uneconomical to maintain, we will tell you honestly and talk you through the next step.

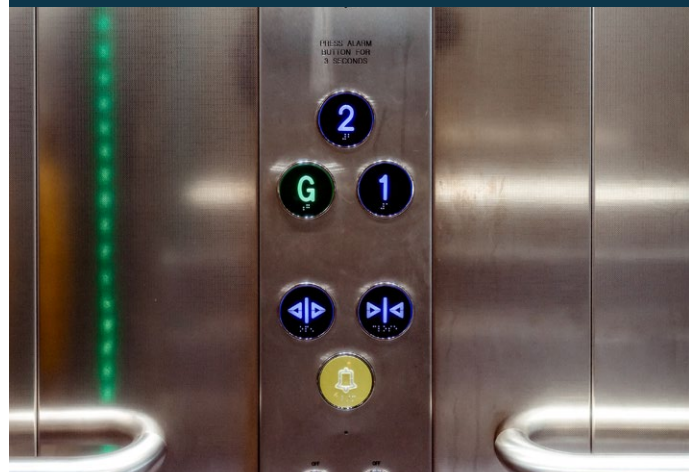

No jargon.

No unnecessary work.

Just repairs and clear advice.

Frequent repairs include

- Door operators and sensors
- Control panels and circuitry
- Motors, ropes and hydraulics
- Cabin lighting and indicators
- Safety edges and alarm systems

Our Approach

The Curti Lifts Approach

Straightforward to deal with. Clear from day one.

You get clear advice, realistic timescales and a team that stays easy to reach throughout the job.

Whether it is a repair, a service contract or a full replacement, the way we work stays consistent.

One point of contact

One person who understands the job and takes responsibility from start to finish.

Clear, proactive communication

Regular updates so you always know what is happening and what comes next.

Real people, clear answers

You speak to someone who understands the work and can act straight away.

Ownership throughout

We do not pass problems around.
We see the job through properly.

**Clear.
Responsive.
Accountable.**

**This is what makes
Curti Lifts easier
to work with.**

Sectors

Sectors We Work In

Lift support shaped around your building.

Every sector shares the same expectations.

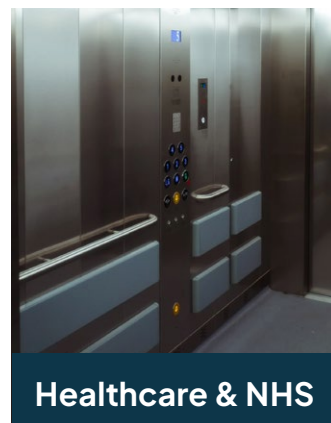

- Safe operation.
- Reliable performance.
- Minimal disruption.
- Clear communication.

What changes is the environment in which those expectations must be delivered.

Curti Lifts understands how different buildings operate and tailors its approach to the people, pressures and practical requirements of each site.

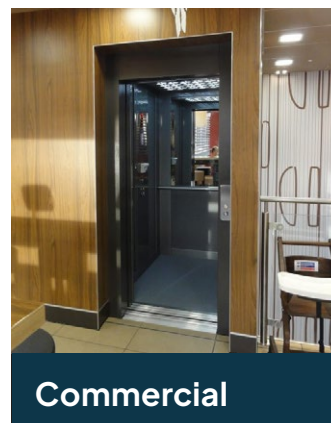

Care Homes

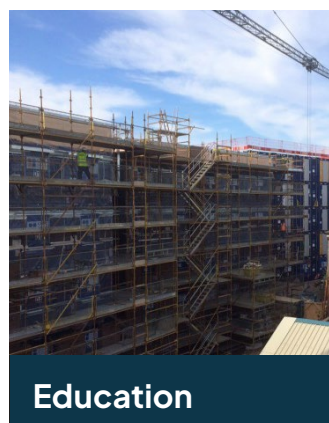

Healthcare & NHS

Public Sector

Commercial

Education

Industrial

Accreditations

Accreditations & Trust

Trust is built on consistency, transparency and proven standards.

Curti Lifts works to recognised industry standards covering quality management, environmental responsibility, health and safety, and lift compliance.

Our accreditations include ISO 9001, ISO 14001 and ISO 45001, alongside approvals and memberships such as CHAS, SafeContractor, Constructionline Gold and LEIA.

For our clients, this means reassurance.

- Projects delivered safely.
- Standards consistently met.
- A partner you can rely on.

Meet the Team

Real people. Real responsibility.

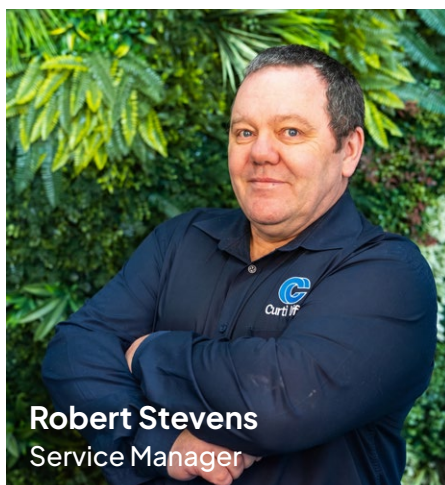

Curti Lifts is built around people who understand the work.

From first enquiry to final handover, clients deal with a team that takes responsibility, communicates clearly and keeps projects moving.

You are not passed around a faceless system. You speak to people who understand the job, know what is happening and can help move things forward.
